PROFESSIONAL SUMMARY

Cybersecurity-focused IT professional with hands-on technical experience supporting enterprise systems across Windows, Linux, and macOS environments. Combines a strong technical foundation in Python, network security, and information assurance with leadership experience, investigative discipline, and a criminal justice background. Known for reliability, problem-solving, and clear communication under pressure. Actively pursuing an **early-career cybersecurity or IT security role** in the defense ecosystem, with growing interest in digital forensics, investigations, and AI-enabled security operations.

TECHNICAL SKILLS

Security & Systems: Information Security | Endpoint Security | OS Hardening | Network Protocols

Programming & Tools: Python | HTML | R | R Studio | Microsoft Excel | Google Workspace

Operating Systems: Windows | Linux | macOS

Professional Strengths: Analytical Thinking | Investigative Support | User Support & Troubleshooting | Documentation | Confidentiality & Integrity in Operations

Certification: ATLONA Foundations of Audio Video

EXPERIENCE

Rhode Island Department of Corrections - Special Investigations Unit (SIU)

Intern, Cranston, RI | Sept 2025 – Present

- Support investigators managing sensitive and high-volume casework, requiring discretion, accuracy, and strong operational judgment.
- Assist with data organization, case documentation, reports, and information tracking using Excel and departmental databases.
- Strengthen investigative and analytical skills by supporting the team's administrative and caseload needs.
- Apply criminal justice knowledge and disciplined communication in real investigative environments.

URI Information Technology Services - Kingston, RI

Student Team Lead | Sept 2025 - Present

Endpoint Support Student Technician | Sept 2024 - Sept 2025

- Deliver frontline technical support across Windows, Linux, and macOS environments, ensuring secure and reliable operation of classroom and instructional systems.
- Diagnose and resolve hardware, software, and network issues in high-availability academic settings, supporting continuity of instruction and time-critical events.
- Support endpoint configuration, imaging, and secure deployment in alignment with institutional IT and cybersecurity standards.
- Partner with IT and security staff to streamline service workflows, strengthen endpoint hygiene, and improve response time across campus.
- Lead a student technician team by assigning tasks, monitoring ticket queues, and maintaining a high standard of professionalism and customer service.
- Coordinate event-related technical support and respond promptly to faculty and staff inquiries.

EDUCATION

University of Rhode Island, Kingston, RI | May 2026

Bachelor of Arts, **Criminology & Criminal Justice**, Minor in **Cyber Security** | Dean's List | GPA: 3.0

Relevant Technical Coursework Experience:

- Performed structured digital forensic analysis using FTK and Autopsy, recovering and evaluating evidence from compromised Windows and Linux systems in controlled lab scenarios.
- Leveraged Python scripting and Wireshark packet analysis to identify anomalous traffic patterns and assess security weaknesses.
- Designed secure network architectures and tested firewall and IDS configurations to validate access controls and strengthen system defense posture.
